

## Soap & Water

don't use antibacterial soap or cleaning products. Much of the antibacterial soap uses a pesticide that is known to harm marine life.

## Flushing

don't flush unwanted or out-of-date medications down the toilet or drain.

## Storm Drains

don't put anything down storm drains because they carry water to local waterways.

## Fix Leaks

fixing leaks that drop from cars and putting liners in driveways to collect oil and other materials.

## Chemicals

avoid using pesticides or chemical fertilizers and choose nontoxic household products whenever possible.

## Pets

pick up after pets and dispose of waste properly.

## Private Well

if you have a private well or septic system, make sure it is tested and cleaner regularly.

## ANDalyze

test the water in your home to make sure it is safe for drinking, bathing and cooking.

Globally we use 70% of our water sources for agriculture and irrigation, and only 10% on domestic uses.
